

About VeriFone

VeriFone is the global leader in secure electronic payment technologies. We provide solutions, services, and expertise that enable electronic payment transactions and value-added services at the point of sale and in self-service applications such as ATMs, kiosks, vending, pay-at-the-pump, automated transit and ticketing, parking and gaming solutions.

Our devices and systems process a broad spectrum of transaction types including signature- and PIN-based debit cards, credit cards, contactless, smart cards, value-added applications and signature capture. Our solutions incorporate existing and emerging technologies, comply with the latest global security standards and take advantage of every connectivity option from WiFi to IP-enabled devices.

VeriFone operates through a network of more than 40 sales and marketing offices and over 30 development centers throughout the world. VeriFone works with more than 40 international partners and is active in over 100 countries. With the help of our offices, partner network and field personnel, we reach virtually every corner of the globe.

THE UNQUESTIONED PAYMENTS LEADER. YOUR PARTNER FOR SECURE UNATTENDED PAYMENT SOLUTIONS.

If you are a manager in self-service systems, you already have enough to think about. Whether you're installing a pay-at-the-pump solution or a kiosk for a quick-service restaurant (QSR), you need a payment solution that's state-of-the-art, highly secure, easy to use and works seamlessly with everything else.

VeriFone is the first name in payment. We pioneered the industry. And we remain one of payment's leading innovators – from retail countertop devices to versatile, adaptable unattended solutions.

Unmatched Product Line

In the face of changing requirements and technologies, we

simplify your task. Our unmatched payment product line extends from self-service modules to countertop and wireless payment devices – with applications tailored to every conceivable vertical market. And we're experts at designing payment solutions that are as intuitive as they are adaptable.

Our unattended solutions range from outdoor PIN pads to complete systems including multimedia devices, transaction and estate management software and implementation and consulting services.

For self-service solutions, VeriFone should be your single point of contact for payment.

VeriFone Hardware Solutions

Vx 700 – Multiple payment options for the most demanding unattended environments

Vx 700 – Designed to fit perfectly into kiosk and vending bill acceptor cutouts. Supports applications for retail, ticketing and transportation, drive-thrus and petro. Fully complies with the latest PCI PED regulations and stands up to the most extreme weather and heaviest usage.

OP 4100 – A feature-rich, multimedia, outdoor payment solution. Perfect for a wide variety of applications for retailers such as petroleum stations, supermarkets and convenience stores. ATM-style keypad, EMV-approved hybrid card reader and contactless reader make it versatile and easy to use. Screen-addressable keys provide flexibility and support highly intuitive, interactive messaging.

OP 4100 – Large color display for maximum multimedia impact

OP 3100 – Proven in demanding environments, including pay-at-the-pump, vending and kiosks

OP 3100 – This indoor/outdoor payment module makes unattended payments easy. It features raised keys on an extra large keypad and a large, graphics-capable, backlit display. Built-in PCI approved secure card reader and PCI EPP approved PIN pad – all designed to withstand harsh environments and allowing merchants to securely dispense goods anytime, anywhere.

Secura – A range of certified modules designed to integrate with unattended vending, kiosk and ticket-dispensing machines. Each module delivers the security benefits of next-generation PIN entry and EMV payment technology, efficiently and cost-effectively. Choose from an all-in-one design or separate keypad/display and EMV-approved hybrid card reader.

Secura – Flexibility for a variety of unattended systems

MX800 Series – The picture of perfection

MX800 Series – The ultimate in multimedia messaging and transactional capabilities. Together with VeriFone's software, the MX800 Series systems can be part of a touch screen payment solution, an identification solution or be used as a compact form of digital signage – utilizing the exceptional durability and signature capture capability of the large, sharp displays. Choose from 65,000 dazzling colors (MX850/MX860/MX870) or a 16-shade grayscale (MX830).

QX720 – Ideal for the most challenging outdoor applications such as drive-thru lanes for QSRs and pharmacies. Rugged, weather-proof design stands up to extreme weather conditions and heavy use. Tough, dip-insertion and contactless card readers, user-friendly ATM-style interface with recessed keypad and sun-readable display allow for trouble-free, around-the-clock usage.

QX720 – A durable, stand alone outdoor PIN pad

Full Suite of Software Solutions and Support

VeriFone offers a full suite of software solutions for transaction management, estate management, signature capture and content control. All our systems for unattended solutions rely on proven operating systems that run multiple applications simultaneously and provide user-friendly interfaces, unsurpassed flexibility, unequalled reliability and unquestioned security.

Our estate management system lets you efficiently monitor remote payment devices, update application software and more. Powerful middleware is built to streamline transaction authorization and settlement and handle communications with a variety of devices. Finally, VeriFone can provide flexible payment engine capability to any size business.

VeriFone also stands ready to support you during testing, setup, implementation and ongoing operations. Our complete program includes training, consulting, professional services, documentation and support.

Proven Across Multiple Markets

No solutions provider has more experience in unattended payment solutions than VeriFone. Our solutions are used by major businesses in fuel retail, transit and ticketing, gaming and parking, vending and kiosks. We have worked closely with leading kiosk fabricators and systems integrators to design and deploy everything from the simplest kiosk to fully customized self-service solutions. Contact us for success stories and white papers.

VeriFone – Undoubtedly Your Best Call

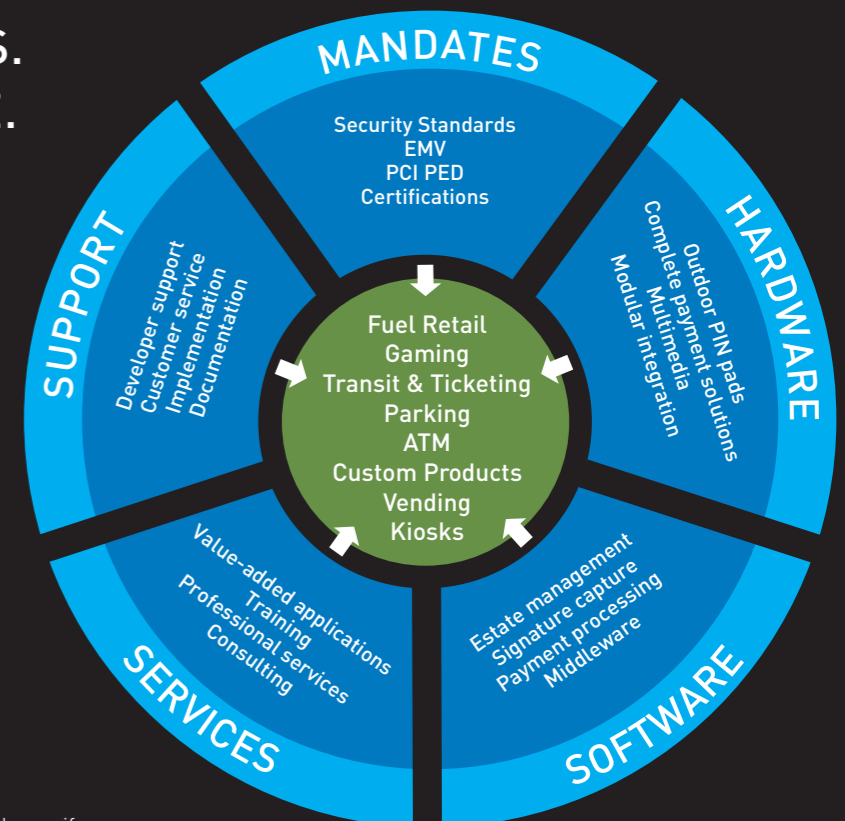

Contact us today to put your plans in motion. We'll discuss your specific requirements, then talk about how we can deliver all the resources you need to implement your unattended solution – from the latest payment systems to installation and support.
