

Verifone e265G

The Verifone e265 with GPRS payment module delivers advanced functionality for small and medium global businesses. The e265 supports all major payment acceptance types and is compatible with the latest operating systems, giving merchants complete flexibility to run their business. Designed as a standalone wireless handheld payment device, the e265 with GPRS provides mobile payment capabilities to merchants without the need for WiFi or pairing with a smartphone via Bluetooth.

- Mobile payment without the need to pair with a smartphone or use WiFi
- Built to last with scratch and impact-resistant Corning® Gorilla® Glass display lens and high-strength polycarbonate housing
- Large, field-replaceable battery provides payment capability for extended hours, minimizing business interruptions
- Programmable device supports Verifone's proven library of embedded applications for quick time to market
- Up to 20 hours of battery life with 10 transactions per hour and CTLS; up to 10 hours of battery life with 30 transactions per hour and CTLS

Specifications

Processor

400 MHz, ARM11 32-bit RISC processor

Memory

128MB Flash, 64MB SDRAM

Display

160×120 monochrome LCD, 2.15" Corning® Gorilla® Glass cover lens technology

Operating System

iOS 8.0 and higher, Android 4.1 and higher, Windows 8.1 and 10

Connectivity

GPRS Quad-Band Gemalto BGS2-W with advanced SSL encryption

Audio

Buzzer (not adjustable)

Card Readers

Triple-track MSR, EMV-approved, chip and PIN smart card reader
