

# Commander16 Mini Site Controller

Commander16 Mini Site Controller from Verifone offers convenience store owners a versatile site management solution providing increased speed in payment acceptance, fueling operations, and back office store control, in a compact footprint. The solution features the Commander Console, a cloud-based software that allows owners to manage all aspects of their business, from fuel to payment and store operations, quickly and easily from any web-enabled device.

## Benefits at a Glance

Commander16 Mini Site Controller is designed specifically for the harsh convenience retail industry, purpose-built for years of trouble-free service. It runs the same software as the Commander Site Controller; making it easy for multi-site owners to mix both Commander Platforms and benefit from a common set of reporting metrics.

- Supports Outdoor EMV implementations  
*\*Specific brands support based on major oil brand/software application*
- Compatible and universally accepted across all oil brands and fuel dispensers
- A single integrated site controller that reduces clutter under the counter or in the back office
- Designed for small to medium-sized convenience store operations, providing the peace of mind that, as business needs change or expand, Commander16 Mini Site Controller will be a sound investment
- Remote report information can be reviewed using Commander console. Data can be reviewed to see trends in reporting at each connected site controller from any web-enabled device
